

Mounting description – Velcro with cut for side supports

1. Disassemble the existing Velcro from the wheelchair by removing the body screw.

2. Fasten the Velcro with cut with the zipper to the back. Please pay attention to have the cables inside the Velcro.

3. Put the hook on the back pipe.

4. Pull the zipper down.

5. Tighten the Velcro with the body screw.

6. Do this on the other side as well and mount the side support according to your needed height.
