DYNAMIC SEAT- AND BACKSOLUTION

Please contact us for recommendation on the choice of gas spring.

Option 1: 15° Dynamic gas spring for the back angle - cannot be blocked - incl. dynamic seat unit
Not allowed for car transportation, as the back angle cannot be blocked.

Back unit with Dynamic gas spring allows 15° trunk extension movements backwards. The standard recline is maintained and can be adjusted in any position. The Dynamic gas spring cannot be blocked. Recommended for stiffness patterns which tend to persist, spasticity, and also for comfort and prevention.

- Dynamic gas spring 80 N
- Dynamic gas spring 120 N
- Dynamic gas spring 160 N

EVOFLEX pelvic stabiliser: Please choose the size from the table on page 13.

Option 2: 40° Dynamic FREE gas spring for the back angle - lockable - incl. dynamic seat unit

Back unit with Dynamic Free gas spring allows up to 40° trunk extension movements backwards. The standard back recline can be locked in any position as the dynamic movement is blocked simultaneously, which can be appropriate during transport or positioning. The back recline and blocking/unblocking of the dynamic back movement is done with a special dynamic release handle. The Dynamic Free gas spring is recommended for severe extension patterns, also for violent and sudden movements.
