D21084	<input type="checkbox"/>	Back wedge	195,-

### Netti Dynamic back cylinder

When mounting the dynamic gas spring the recline is reduced to 90° - 118° and the main wheels are positioned as far back as possible. Please contact us if an active wheel position is required.

The standard back recline can be locked in any position as the dynamic movement is blocked simultaneously, which can be appropriate during transport or positioning. Incl. Bodypoint Evoflex pelvic stabilizer 2-point belt:

Size XS  M  L

For more information and choice of gas spring, feel free to contact us or have a look at our website. If combined with other options, please send us a request as some solutions are only possible as special adaptations.
