**Ref.: Risk assessment Netti head support to be used on a wheelchair as seat in a car**

The following Netti head supports are confirmed to be used on a Netti wheelchair when used as seat in a car.

Head support A, B, C, D, E, Dynamic head support, Head support Relaxo and Head support Mini.

Netti has crash tested their products at TASS International AS test centre in Helmond Netherlands according to ISO 7176-19 in September 2024.

Head supports as being part of the wheelchair by connection to the frame, supporting the head of the user. For all wheelchair users correct and adapted head support is an important item to secure correct seating position as well as body and head support.

Head supports were further tested as part of a Netti wheelchair according to EN 12183, carried out by a German accredited test laboratory.
