Ergomise™ Technology cushions

Netti Precision Active

For active wheelchair users in need of ventilation, moist control, skin protection and stability

- Great microclimate control
- Unique airflow to maintain skin integrity
- Pressure redistribution and relief across seating interface
- Protects bony areas including sit bones and tailbone
- Pelvic stabilisation ensures good seating position
- Shock absorption reduces risk of pressure injuries
- Hygienic & quick dry core

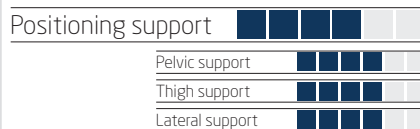

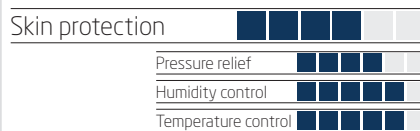

225-500 mm 270-550 mm

Netti Precision 1

For users at risk of skin injury, need for stability and microclimate control

- Unique microclimate control
- Unique airflow to maintain skin integrity
- Optimized pressure distribution across the seating surface
- Pressure relief across seating surface
- Protects bony areas including sit bones and tailbone
- Pelvic positioning support ensures good seating position and stability
- Great immersion minimizes risk of sliding forward and shear forces
- Lateral stability for trunk alignment
- Hygienic & quick dry core

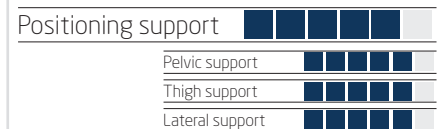

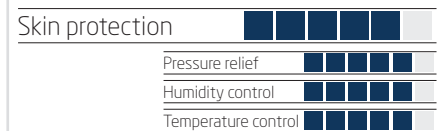

400-550 mm 350-600 mm

Netti Precision 2

For users at higher risk of skin injury, need for stability and microclimate control

- Unique microclimate control
- Unique airflow to maintain skin integrity
- Enhanced pressure relief for tailbone and pelvic floor areas
- Superior pressure distribution for maximum skin protection
- Strong pelvic support for optimal seating position and stability
- Great off-loading minimizes pressure at pressure injury sensitive areas
- Lateral stability for trunk alignment
- Hygienic & quick dry core

400-550 mm 350-600 mm

Foam cushions

inspire joy of life

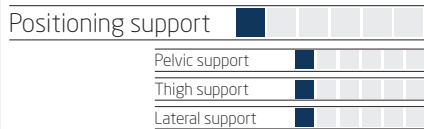

Netti Contour

Good comfort for active wheelchair users

- Contoured
- Good comfort
- Designed to match the needs of active wheelchair users.

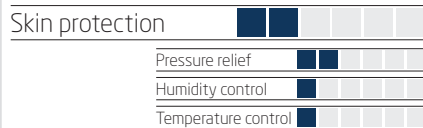

400-500 mm 400-500 mm

Netti Uno Seat

For users with good body stability

- Superior standard cushion
- Multi-layer foam
- Soft top layer for good sink-in
- The use of softer foam at the rear end of the intermediate layer prevents forward sliding.

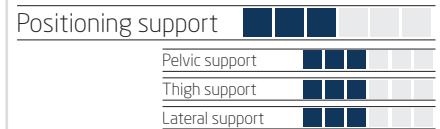

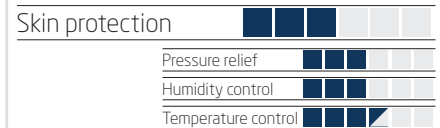

400-550 mm 350-600 mm

Netti Sit

For users in need of pressure relief and positioning support

- Built-in lateral support provide more stability and contact area.
- Good pressure distribution properties
- Allows you to sink in quickly for rapid pressure distribution
- Foam of different hardnesses stabilizes the seating position and prevents forward sliding
- The built-in abduction helps straightening of the spine and improves the seating position.
- Temperature stabilizing cover available for extra micro climate control

400-550 mm 350-750 mm
